Hannibal: Authentic Latin Prose for the Beginning Student:

1 of 1 review helpful Beyer's two books provide an excellent transition from the made up Latin of most elementary textbooks. By RPA The author has said it all in his introduction. Beyer's two books provide an excellent transition from the made up Latin of most elementary textbooks to the language of real Latin authors writing to native speakers of Latin. These books provide a sorely needed bridge as students begin to learn. This edition of Book III of Eutropius' *Breviarium ab urbe condita* is designed to be a student's first encounter with authentic unabridged Latin prose. Written in a simple and direct style, the *Breviarium* covers the period of Roman history that students find the most interesting: the Second Punic War fought against Carthage and the original Latin text is supplemented with considerable learning support. Full annotations on every page are clearly presented and annotated with just the right amount of help; it answers better than any other text I've seen the perennial problem of how to do the transition from learning the basics of Latin to actually reading Latin.
