2 of 2 review helpful Great book very readable By E Lauber If you are interested in the situation of the 1800 or so languages spoken in Africa this is an excellent book Batibo writes well and does not engage in polemics even when he presents very specific points of view on the issues His estimates for the number of languages in danger is too large in my opinion 2 of 2 review helpful The aim of this book is to inform both scholars and the public about the nature and extent of the problem of language decline and death in Africa It resourcefully traces the main causes and circumstances of language endangerment the processes and extent of language shift and death and the consequences of language loss to the continent's rich linguistic and cultural heritage The book outlines some of the challenges that have emerged out of the situation This is an excellent introduction to the topic of endangered languages in Africa nbsp Mike Cahill SIL International Linguist List 16 3542 About the Author Dr Herman M Batibo is Professor of African Linguistics
