3 of 4 review helpful Outstanding By Andoryu I've found this book especially helpful because it not only discusses some specific issues with Japanese translation e.g. translating haiku honorific expressions etc but also has a section dealing with analysing Japanese sentences step by step. There are no exercises to do as such but that suits me because I can read it on the bus going to and from work without needing to. Translating Japanese Texts is a practical textbook and a precise introduction to problems of and strategies for translating Japanese texts aimed at both students and teachers of translation and professional translators. The theoretical foundation is that texts are created by means of interplay between different levels of linguistic material and pragmatic cognitive and cultural mechanisms. The authors claim that all translation should hence take such factors into account. The Author Kirsten Refsing is professor formerly of Japanese Studies at the University of Hong Kong. Lita Lundquist is professor of Languages for Specific Purposes at the Copenhagen Business School.
